Marcelo Henrique Bugula Farinha

Solutions Architect | Software Engineer | PLSQL | Java | Oracle Certified | MFCS | SIOCS | OBCS | CECS
Marília, São Paulo, Brazil

Summary

As a Systems Consultant at Retail Consult, I work with web integrations, API development, and database management for clients in the retail sector. I have more than 7 years of experience in software engineering, with expertise in Java, PL/SQL, SQL, Oracle Cloud, and Azure DevOps. I have several certifications from Oracle and Microsoft, demonstrating my proficiency and commitment to continuous learning. I enjoy solving complex problems, collaborating with global teams, and delivering high-quality solutions that meet users' needs and expectations. Successfully implemented system improvements, generated reports and recovered applications from critical incidents. I'm passionate about technology and I'm always eager to learn new skills and tools that can improve my performance and career.

Experience

Retail Consult

3 years

Solutions Architect

May 2026 - Present (1 month)

Curitiba, Paraná, Brazil

Systems Consultant

June 2023 - May 2026 (3 years)

Curitiba, Paraná, Brasil

- Designed and implemented integrations for Oracle CECS, OBCS, MFCS, SIOCS, and XOCS using Java and PL/SQL.
- Successfully integrated new cloud systems with on-prem systems for Hibbett Sports, meeting tight deadlines.
- Led design, development, and customer meetings for a project alongside the main project at Retail Consult.

PANTHEON INC. BRASIL

Consultant | Senior Systems Analyst

May 2022 - June 2023 (1 year 2 months)

Curitiba, Paraná, Brazil

Customer: ExxonMobil

ExxonMobil is one of the largest companies in the world and the largest in its sector (oil and gas) in the United States. During my tenure with this company, I was responsible for the Ariba payment systems (a Java web application), supporting production and acceptance (testing) environments. In addition, I implemented system improvements and generated reports for users. Working in a global team, attending meetings with internal clients worldwide. During that period, I improved an email template for a pipeline on Azure Data Factory. Also, I upgraded Azure Function Apps' runtime.

Key accomplishments:

Ariba recovery: In 2022, the application experienced two instances of downtime. I successfully restored the application, preventing financial harm to the client. In recognition of this work, I received an award from the client.

Ariba Retirement: As the company's primary payment interface in the past, data migration was crucial for retaining data for future audits. I was responsible for developing queries to fetch old data from the archive database.

Matera

Senior Systems Analyst

November 2021 - April 2022 (6 months)

Campinas, São Paulo, Brasil

- Modeling and development of systems using:
 - Java (Spring Boot),
 - SQL Oracle,
 - PL/SQL: Stored Procedures, Functions, Triggers, Packages, Objects (at schema and block-level), Collections (Associative Arrays, Nested Tables, Varray), Cursors, REF Cursors, Types, Objects, Mass collect, Forall;
- API development and documentation using Swagger
- Version control using Git;
- Package management with Maven;

- Use of agile methodologies and demand control using Jira;
- Automation of API's tests with Python.

Wipro Brazil

Systems Analyst | Tech Lead

December 2020 - November 2021 (1 year)

Curitiba, Paraná, Brazil

- Modeling and evolution of entities for tables in relational databases;
- Systems development using: SQL (Tables, Views, Materialized Views, Constraints, Indexes, Sequences, Merge) PL / SQL: Stored Procedures, Functions, Triggers, Packages, Objects (at the level of schema and in PL / SQL blocks) , Collections (Associative arrays, Nested Tables, Varray), Cursors, REF Cursors, Bulk collect, Forall;
- Data integration using Oracle Advanced Queue and OSB (Oracle Service Bus)
